Simple Slider

By Hippo Games

Welcome! Hope you will enjoy working with my asset!

About:

Simple Slider extends ScrollRect functionality by adding "center on child" and "swipe" features. It can be used for interactive presentations and banners.

Features:

- Any banner size
- Paginator
- Swipe
- Navigate by URL
- Works on iOS, Android, WebGL and Desktop

How to run:

- Open SimpleSlider.Demo.scene

How to use:

- Place SimpleSlider/Prefabs/Slider to your scene
- Change its' size as well as grid cell size
- Specify a list of banners (Banners field). Each banner should have a name, URL and a sprite
- Run your scene
